Cord & Chain Length Installation Safety

Maximum Cord and Chain Lengths Where Fitting Height Is Unknown

When ordering blinds, it is essential to state the installation height. Not only is it a legal requirement, knowing the correct measurements will help to avoid making costly on-site amendments. According to new legislation your chosen surveyor or installer should know the correct height for corded blinds, but please don't leave it to chance.

As a member of the British Blinds & Shutter Association (BBSA), Loveless Cook Blinds welcome new regulations that came into effect in 28th February 2014 and relate to the installation of window blinds. The BBSA has been campaigning for safer blinds and has worked with the UK government and EU standards bodies to develop new standards that will lead to safe blinds for children and vulnerable people being developed.

We fully support child safety regulations and as well as ensuring all the new window blinds we manufacture are compliant, we are also ready to help any customers who would like advice regarding the installation of appropriate safety devices for existing window blinds.

Please be aware on all orders placed which have a chain or cord operation, we will require an installation height which will then be calculated to ensure the chain or cord drop is no lower than 150cm from the floor. The only exception to this legal requirement is when a breakaway safety system is used on roller blinds (only), which then can allow for a chain to be as low as 60cm from the floor.

METAL CURTAIN POLES

Wrought Iron Collection

PRODUCT INFORMATION

A unique collection of Made to Measure curtain poles and finials, hand made from Wrought Iron. Available with a range of finials designed for traditional interiors. Traditional hand forging produces: fine quality finials, elegant hand made scrolls, brackets with hammered back plates and hand twisted rings.

STRAIGHT POLE SET

Straight poles are made to fit to your window. A wide choice of brackets meets most fixing requirements. Intermediate brackets and passing rings cater for long straight poles, giving support without restricting the movement of curtains. Poles over 300cm can be joined so that the rings can pass the join. There is no maximum length for straight poles.

BAY POLE SET

Passing rings and intermediate brackets offer an ideal solution for bay windows. Corners are well supported, but a single pair of curtain pulls around the bay. Traditional bay poles are made to measure with bends made to fit your window. Just complete a bay window measure form and we'll provide a ready to fit solution.

DIAMETER OPTION

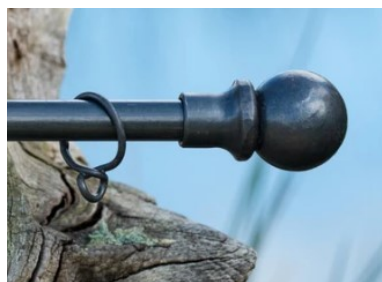

Wrought Iron collection available in 16mm and 20mm diameter.

- 16mm Diameter available in sizes; 120cm, 140cm, 160cm, 180cm, 200cm, 240cm and 280cm.
- 20mm Diameter available in sizes; 120cm, 140cm, 160cm, 180cm, 200cm, 240cm, 280cm, 320cm and 360cm.
